### Rainbird® Sprinkler Systems

Summit Lawn and Landscape is proud to give you information regarding our quality installed, Rainbird® Sprinkler Systems. Quality products and quality workmanship are key factors in having a professionally installed system at your home or business. Thank you for the opportunity and we look forward to working with you soon.

Our Rainbird® Sprinkler Systems are...

- ❑ Backed with a full, one-year parts and labor warranty. A five year extended warranty on all Rainbird® parts is also given if Summit Lawn and Landscape performs the necessary system start-up, service, and system winterization it will need on a year-to-year basis.
- ❑ Comprised of only Rainbird® system components, ensuring you get a 100% quality installed, and efficient sprinkler system.
- ❑ Comprised of multi-program, system controller which enables you to set your watering times on as detailed a watering schedule you wish between your, lawn, trees, and shrubs.
- ❑ Comprised of PRS Rainbird® spray heads, which restricts the water pressure to the head, requiring only the needed pressure for that particular watering zone.
- ❑ Equipped with Rainbird® 5000 rotary heads with the new RainCurtin® technology. This minimizes drift allowing for optimal coverage, with the least amount of water, keeping your water bills as efficient as possible.
- ❑ Equipped with a rain sensor that allows you to set your system to shut down with large amounts of rainfall, reducing unwanted water during periods of heavy rain.
- ❑ Designed with head-to-head coverage which ensures you will have no dry spots in your lawn, and will ensure property amounts of water are distributed to the many different areas of your lawn.
- ❑ Tested for adequate system pressure prior to installation, ensuring the system reaches it optimal capacity to efficiently produce adequate water amounts to the different zones in your system.

All of our systems come with the above listed features which does make in a difference when it comes to comparing costs with a non-efficient, poorly designed system. If budget is an issue, we can work with you on alternate options for your system. A quality-installed system will save you money and headaches in the long run, and will pay for themselves in watering efficiency and minimal system repairs down the road.
