

SUMMIT LAWN AND LANDSCAPE, INC.

LAWN PROGRAM

APPLICATION #1

THIS GRANULAR APPLICATION CONSISTS OF A PRE-EMERGENT WEED CONTROL PLUS A WELL BALANCED, SLOW-RELEASE, FERTILIZER. THIS APPLICATION IS APPLIED IN EARLY SPRING FOR CONTROL OF GRASSY WEEDS, SUCH AS, CRABGRASS, GOOSEGRASS, AND FOXTAIL. IT ALSO FORTIFIES THE LAWN WITH ESSENTIAL NUTRIENTS TO STRENGTHEN YOUR LAWNS OVERALL DURABILITY AND VIGOR.

APPLICATION #2

THIS APPLICATION IS THE SAME AS NUMBER ONE, BUT IS APPLIED IN LATE SPRING. BROADLEAF WEED SPRAY IS APPLIED AT THIS TIME AS WELL. THIS WILL HELP CONTROL BROADLEAF WEEDS, SUCH AS, DANDELIONS, CLOVER, HENBIT, AND PLANTAIN FOR THE MONTHS TO COME.

APPLICATION #3 AND #4

THIS GRANULAR APPLICATION CONSISTS OF A WELL-BALANCED FERTILIZER AS WELL AS A PREVENTATIVE GRUBWORM CONTROL. THESE APPLICATIONS ARE APPLIED SIMULTANEOUSLY DURING THE EARLY SUMMER MONTHS FOR PREVENTION OF GRUBWORMS. THE FERTILIZER WILL AID IN STRENGTHENING THE LAWN FOR THE HOT SUMMER MONTHS TO COME. SPOT WEED SPRAYING IS ALSO DONE AT THIS TIME.

APPLICATION #5 AND #6

THESE GRANULAR APPLICATIONS CONSIST OF A SLOW RELEASE FERTILIZER TO HELP PROMOTE STRENGTH, DURABILITY, TEMPERATURE TOLERANCE AND OVERALL VIGOR FOR THE LAWN. BROADLEAF WEED SPRAY IS APPLIED WITH APPLICATION #5. THESE APPLICATIONS ARE APPLIED IN EARLY FALL AND LATE FALL.

OPTIONAL LIME APPLICATION #7

LIME IS RECOMMENDED FOR LAWNS CONTAINING ACIDIC SOILS. ACIDIC SOIL CAN BE CORRECTED WITH THE USE OF PELLETIZED LIME. ACIDIC SOILS PREVENT GRASS FROM ABSORBING PROPER NUTRIENTS AND PROVIDES FOR AN UNHEALTHY GROWING ENVIRONMENT. THIS IS TYPICALLY DONE IN THE FALL.

AERATION/SEEDING

WE STRONGLY RECOMMEND AERATION AND SEEDING WITH YOUR LAWN PROGRAM. AERATION WILL STRENGTHEN YOUR LAWNS ROOT SYSTEM, REDUCE COMPACTED SOIL, AID IN FILLING IN BARE SPOTS IN THE GRASS, AND REDUCE THATCH BUILD-UP IN THE LAWN. SEEDING CAN BE DONE IN CONJUNCTION W/ THE AERATION, KEEPING THE LAWN AS FULL AND LUSH AS POSSIBLE.

FUNGICIDES

IN RECENT YEARS, KANSANS HAVE HAD A PROBLEM WITH FUNGUS DURING THE HOT SUMMER MONTHS. IF SUCH A PROBLEM SHOULD ARISE, YOU WILL BE CONTACTED AND THE PROBLEM WILL BE DEALT WITH ACCORDINGLY. CHARGES FOR FUNGICIDES ARE ADDITIONAL AND TYPICALLY RUN ABOUT TWICE THE COST OF A NORMAL APPLICATION.

PROBLEM WEEDS

SPOT SPRAYING OF YELLOW AND PURPLE NUTSEGE ARE DONE FREE OF CHARGE. IF A HIGH INFESTATION OF THESE PROBLEM WEEDS SHOULD ARISE, THEY WILL BE DEALT WITH AND CHARGED FOR ACCORDINGLY ONLY AFTER DISCUSSING IT WITH YOU FIRST.
